PROFILE: INTERN SITE ENGINEER

- **Site Execution:**
 - Technical Supervision: Interpreted and reviewed structural, architectural, and MEP drawings for execution; verified on-site implementation as per approved plans.
 - Reinforcement & Formwork Checks: Conducted inspections of reinforcement placement before concreting and worked hands-on with Aluminum Formwork systems, gaining exposure to advanced construction technologies.
 - Quantity Estimation: Calculated material quantities for concrete, reinforcement, and other construction materials required on a daily basis to support site operations and reduce wastage.
 - Coordination & Collaboration: Coordinated closely with contractor engineers and subcontractors to align work sequences, solve site-level issues, and ensure timely task execution.
 - Quality Control: Identified and flagged construction defects, such as improper formwork alignments or reinforcement errors, and ensured corrective actions were taken promptly.
 - Safety Monitoring: Monitored site safety conditions and promptly reported potential hazards to senior engineers to maintain a safe working environment.
- Documentation & Reporting: Maintained up-to-date documentation of drawings and specifications. Prepared daily and weekly progress reports, including manpower deployment, work status, and material consumption.
