Web Automation: Selenium WebDriver, TestNG

Defect Tracking Tools: JIRA

Version Control/CI/Build Tool: GitHub, Jenkin, Maven

Experience/Projects

Testometer Pvt Ltd. Pune, India “ QA Engineer November 2022 “ Present

Project: Cera Med

Client: Cera

Project Description: Cera provides pensioners with at-home carers who can offer support with medical issues, wellness, and personal services such as shopping. Cera provides six types of care services: elderly care, live-in care, palliative care, respite care, dementia care, and post-discharge care. Once the type of care required is established, carers are matched to patients based on relevant experience and whether they share any interests. Cera’s app allows users to stay connected throughout the process and easily identify tasks, appointments, and other administrative necessities. Additionally, all care provided by Cera is CQC-regulated, with options to subscribe to overnight or live-in care so that elderly patients can remain at home.

Roles and Responsibilities:

- Actively participated in Test plan preparation.
- Participated in identifying the various Test Scenarios for Functional Testing. Designing of Test Cases.
- Prepared scripts to automate functional Test cases.
- Involved in a Retrospect meeting for the Test scripts prepared by others.

•Performed GUI, Functional, Regression Testing.
