Worked on inbound truck turnaround time (TAT) reduction at the plant level for raw material and packaging material operations.

1. Conducted Makigami Analysis to map the end-to-end truck receiving process and identify value-adding vs. waste steps.
2. Analyzed data across 1,400+ truck entries, identifying key bottlenecks - QC approval delays, unloading bay unavailability, route confusion, and GRN posting delays in SAP.
3. Benchmarked Excel TAT data (32-46 hrs) against ground reality (2-4 days) through driver, security, and store personnel interviews.
4. Developed a Vendor Scorecard to track slot adherence, on-time arrival, and delivery compliance.
5. Contributed to SOP documentation and process flow mapping for plant operations.
