PROFILE: Site Execution + Control

As an **Intern – Site Execution and Control**, I collaborated with the site engineering team to monitor daily construction operations, including civil, structural, finishing, and MEP works, to ensure that work was performed in accordance with approved drawings, technical specifications, quality standards, and project schedules. Monitored contractor workforce deployment, material utilisation and site progress. Maintained daily progress reports and supported project documentation. Participated in quality inspections with the QA/QC team, verified material quality and quantity, and assisted in maintaining compliance records. I also performed health and safety checks, communicated unsafe working conditions and promoted compliance with established HSE guidelines. Also, I coordinated with contractors/vendors and internal project team to ensure smooth workflow. I attended site coordination meetings and prepared Minutes of Meeting (MoM). I followed up on pending activities to ensure they were completed on time. I supported efficient utilisation of resources by monitoring the delivery of materials, storage, consumption, and wastage during the construction process.
