0 Years, 6 Months, 11 Days**PROFILE:** GRADUATE ENGINEER TRAINEE - QUALITY CONTROL

In this company I worked as a Graduate Engineer Trainee (GET) - QUALITY CONTROL where I used to perform all the quality tests on building materials, cement concrete, and concrete structures. Apart from these activities I also supervised Site execution activities, Labour management, material management activities, and safety Management.

The detailed responsibilities include:

Quality and Process Control (QA/QC): Spearheaded QA/QC protocols for raw materials, cement concrete, and structural elements conforming to IS/standard codes, formulated systematic testing logs and site checklists to minimize non-conformances and rework.

Site Execution & Resource Management: Supervised day-to-day site execution for foundations, formwork, and reinforcement against baseline drawings, managed labor deployment and daily output targets to optimize site productivity.

Progress Tracking and Reporting: Generated detailed Daily Progress Reports (DPRs) and tracked project milestones, bridged communication gaps between design teams, contractors, and field crews to resolve technical bottlenecks.

Labor & Workforce Management: Directed daily site labor and subcontractor teams, setting targets and conducting morning toolbox talks for safety and quality. Managed workforce deployment, daily attendance records, and site-level resolution to maximize productivity.

In this role the following responsibilities has been carried out:

Project Health & Risk Assessment: Assessed overall project health across 15 critical operational pillars including project governance, cost estimation, schedule management, and procurement strategies to identify commercial risks.

Financial & Contractual Auditing: Conducted rigorous risk audits on project documentation, including RA bill certifications, vendor payment terms, change orders, and statutory compliances.

Stakeholder Reporting & Executive Presentation: Developed visually engaging, structured PowerPoint presentations to communicate complex risk audit findings, issue initial solutions, and present strategic recommendations to senior leadership and domestic/global stakeholders.

Governance & Handover Protocols: Reviewed project MIS reporting, tracked variation orders/change controls, and aligned end-to-end documentation to support risk mitigation, project

handover, and closeout protocols.

Safety & Regulatory Compliance Review: Audited site safety protocols and risk management frameworks to ensure alignment with industry regulations, contract provisions, and client quality standards.
