PROFILE: GORIGE DAKSHA

As a Junior Architect, I assisted senior architects in concept development and preparation of architectural drawings, including plans, sections, elevations, working drawings, and detailed drawings. I developed 3D models and basic visualizations for design presentations and supported the preparation of presentation boards and design reports. I participated in site visits to understand construction methods, inspect ongoing works, verify drawings against actual site conditions, and coordinate with civil engineers, contractors, and MEP consultants. I also assisted in preparing documentation for municipal and other applicable statutory approvals, maintained drawing logs and revisions, and supported the preparation of tender drawings. Additionally, I contributed to material research, preparation of material schedules and specifications, vendor coordination, quantity take-offs, area statements, and basic BOQ comparisons in coordination with quantity surveyors and estimators. I also supported client presentations, attended project meetings, prepared minutes of meetings, and maintained project files and records to facilitate smooth project coordination and timely completion of project activities.

PROFILE: Intern

I was responsible for assisting in the **planning and scheduling of ongoing projects**, including developing and updating project schedules, tracking progress against planned activities, and coordinating with the project team to ensure timely execution. I supported the **design coordination process** by reviewing drawings, identifying design-related issues, and coordinating with consultants and site teams for necessary revisions and clarifications. I was also involved in **delay analysis of ongoing projects**, where I monitored planned versus actual progress, identified the causes and impacts of delays, and assisted in evaluating their effect on project timelines. Additionally, I supported project documentation, progress reporting, coordination meetings, and follow-up of critical activities to help the team take appropriate corrective actions and maintain project schedules.
